Standard Fee & Sliding Scale* Description	Fee/time
This level of payment is the standard fee for a full session or consultation with a successful, experienced clinician helper.	\$155/50 minute session
This level of payment is for those who work and who may also have potential out of network benefits to help pay for care but for whom the full fee would not be do-able.	\$124 / 50 minute session
This level of payment is available to those who could not attend therapy except if they were offered a significant cut in the fee for services. If this is you, please talk to us! We want those who need help to get it, while reserving this fee scale only for those who really need it. We will have a brief, confidential discussion when we discuss your TOTAL household income and typical expenses. We'll take into account special circumstances.	\$55-115 for a 45 minute consultation or sessions
This level of payment for short-term consultation or sessions is available for those having Medicaid insurance and family circumstances that warrant this level of sliding scale.	\$50 for a 45 minute consultation; \$30-50/45 minute session

****We reserve the right to request documents that confirm your family income such as tax return, pay stub, and expenses, etc.***
